DETAILED ACTION

Reasons for Allowance

Claims 9 and 12 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art (Hatori and U.S. Patent 6,334,014) teaches an optical fiber with a structure that reflect and diffract a light beam except for protruding or recessed core region. Although prior art teach optical communication fibers with protruding and recessed cores on their end faces, (e.g., US. Patent 5,908,562, U.S. PGPub 2002/0076157) they do not teach or suggest the end faces can reflect and diffract light beams coupled thereon. It is the examiner's opinion that the prior art of record, taken alone or in combination, fails to disclose or render obvious the core/cladding entrance face structure of the optical fiber what diffracts a light beam reflected by the entrance face in combination with the rest of the limitations of the base claim.

Claim 28 is allowed. Hatori teaches the optical fiber with steps (grating) that is coupled to a light source and reflects a light beam except for the step height being less than $\lambda/4n$. The condition for high reflection, known as the Bragg condition, relates the reflected wavelength λ , or Bragg wavelength, to the grating period P (step height) and the average refractive index n via $\lambda = 2 n P$. Thus the grating period would be at least twice as large as that claimed by the applicant. It is the examiner's opinion that the prior art of record, taken alone or in combination, fails to disclose or render obvious in combination the step height with the rest of the limitations of the base claim.

Claims 10, 11, and 29-42 are allowed as dependent claims of the allowed claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with W. Pieprz on November 8, 2005.

The application has been amended as follows:

Claim 8: Please cancel claim 8.
